

Included in your Wolsey Hall courses

All our course fees include the required course books, access to online learning materials and subscriptions, as well as access to a selection of free Wolsey Hall courses and guides. You will be allocated Tutors who will provide feedback on submitted assignments and respond to academic questions submitted via our messaging system on our learning platform. In addition, you will have access to the Community area, Clubs and Virtual Library.

Primary courses cover curriculum content for one academic year, designed to be completed within one year.

How our course fees work

We offer course bundles so the more subjects a student enrolls on, the lower the cost of each course. It is possible to study at different year levels within the Lower Primary, Upper Primary, Lower Secondary, IGCSE and AS/A Level levels (this does not include enrolling on the same subject at different levels at the same time), if the entry criteria are met. If you are considering combining Primary subjects with other courses across different years, reach out to our team if you need support.

Sibling benefits

We offer a 10% discount to the sibling of a new or current student of Wolsey Hall Oxford. The first student from a family enrolled with Wolsey Hall will not receive a sibling discount.

Bundle fees

To find the price per course, use the column that represents the total number of courses that your child will be enrolling on now for this academic year, e.g. if your child is enrolling on 3 Lower Primary courses, please use the column entitled '1-3 courses' to see the course prices. We offer you the facility to pay the fees in full or by instalment. If you choose to pay in full, you receive a 5% discount, as shown in the prices on Page 2 and 4.

Calculating our fees

STEP ONE

Count Your Subjects

List out all the subjects you want to take, together with the likely year group.

These could be a range of Primary and Secondary courses, as long as each subject appears once.

1

STEP TWO

Find the Matching Bundle

Once you know how many subjects you are taking, find the corresponding bundle column. For instance, if you are taking 5 subjects, look at the 5+ Course Bundle column.

Please note that Short Courses cannot be included in the bundles.

2

STEP THREE

Check the Fees

In the selected bundle column, locate each subject you listed and note down its fee.

Remember, if your subjects are from different levels (like Lower Secondary), you might need to consult our Secondary Course Fees document.

3

Fee Example

Oliver is going to study 4 Lower Primary subjects so his prices are in the 4 course bundle column - English (£617.50), Maths (£617.50), Art (£522.50) and Humanities (£522.50). His total cost of courses will be £2,280.

Remember, if your subjects are from different levels (like Lower Secondary), you might need to consult our Secondary Course Fees document.
