

**NAME: Student's Name.****YEAR: 5****PART: 1****SUBJECT: Mathematics****ASSIGNMENT 1: 96%**

A super assignment \*\*\*\*\* which demonstrates your increasing understanding of mathematics. It was a little tricky to read some of your answers because the pencil was very light, but I can see that you have supported your answers with your working out. I was delighted to see all the correct answers to the word problems in question 8. Great work!

**ASSIGNMENT 2: 89%**

Well done \*\*\*\*\* a super score for a tricky assignment. Well done for being so accurate with your subtraction in questions 6,7 and 8. I was really pleased to see the factors were all correct and multiplication tables too; great! Have a look at the perimeter questions again for me. The perimeter means the distance all around the edge of a shape. I think you will see where you went wrong.

**ASSIGNMENT 3: 98%**

An excellent score to finish this term \*\*\*\*\* . You have worked so carefully throughout this assignment. I was especially pleased to see the correct answers for the equivalent fractions and that you can simplify too. Finally well done for the accurate calculations with the multiplications - GREAT!

**STRENGTHS:**

Another super term of excellent assignments \*\*\*\*\* , with an average of over 94%; superb!

I am delighted to see your continued methodical and systematic approach with your answers and calculations. I was especially pleased to see the word problems answered so carefully. Great work – can't wait to mark next term's assignments.

**AREAS TO IMPROVE:**

When you produce such great assignments, it is hard to find areas to improve! Keep reading the questions carefully, circle key words or numbers in a problem to help identify the important information and double check your answers. Keep up the good work \*\*\*\*\*!
