

## PROGRESS REPORT

# Year 9 Maths

Student: [REDACTED]

DATE STARTED: February 2018

DATE COMPLETED: November 2018

The average assignment  
grade attained was:  
74%

### Tutor comments

[REDACTED] has worked brilliantly this year and made great progress in both the quizzes and assignments. She has a mature attitude to her studies and is able to combine studying with competitive horse riding, keeping good communications if there will be a delay in the submission. Crucially [REDACTED] has realised for herself the importance of studying a topic thoroughly rather than rushing to complete it. I am pleased that she always works through assignment feedback, to ensure a full understanding of the work. [REDACTED] received 100% in one of the teacher-marked assignments on straight-line graphs, ratio and proportion, and it is worth noting that she has also received 100% in three of the quizzes – well done [REDACTED]!

### Progression to Year 10

I was delighted to learn that [REDACTED] is continuing her studies with us as she is such a pleasure to tutor. Provided that she continues studying to her usual high standard, she should be able to approach the year 10 work with confidence and achieve another set of good marks. She already shows her workings brilliantly, so I look forward to seeing how she applies the methods learned in Year 10. Good luck [REDACTED]!
