

## PROGRESS REPORT

# Year 9 Science

DATE STARTED: June 2020

DATE COMPLETED: February 2021

Student: Xxxxxx XXXXXXXXXXXX

### Tutor comments

#### Final test feedback

Xxxxxx's final test grade of 85% demonstrates how hard she has worked. She scored well over the different topics scoring full marks on seven questions. She showed great knowledge and understanding of cell structure and specialised cells, forces, acids, electricity and circuits, reproduction, light, ecology, energy, weight and masses, analysing experimental results and experimental methodology.

#### Progression to IGCSE

Xxxxxx's progression to IGCSE should be straightforward if she continues to work hard, keeps improving her assignment/exam question technique, reviews how to write an experimental method and acts on any feedback given to her by her tutor(s). I think Xxxxxx's high marks in all her assignments show not only her progress in Science but her enthusiasm for the subject which bodes well for IGCSE.

Tutor Name

The average assignment  
grade attained was:  
89%

The final test grade  
attained was:  
85%

This is to certify that  
Xxxxxx XXXXXXXXXXXX  
has completed  
Wolsey Hall Oxford's  
Year 9 Science course.
